

## Case Study

### Wayland House

This project involved the upgrading of a South London high-rise block aimed at increasing fire performance for Tenants.

**Housing Type:** High-Rise block in Stockwell, London Borough of Lambeth

**Duration:** 12 weeks

**Project Size:** Supply only of 86 Fire Doorsets

**Product Specification:** Fire Doorset rated to 30-minutes for fire & smoke. Composite slab stained and lacquered in light oak finish with chrome hardware, locking to Secured By Design including self closer. White painted FSC hardwood outerframe with integrated intumescent seal & low level threshold.

**Complexity:** Deliveries made to exacting timescales to cope with difficult access and unloading whilst minimising disruption to Tenants. Blocks were occupied during refurbishment.

**Measured Benefit:** Transformation of safety and security whilst contributing to bringing the block up to the latest fire safety standard for Tenants.
